

CS GY 6513 – Big Data: Prof. Amit Patel

Project Report Expectations:

One team member of each team needs to submit project report on Brightspace, after the project demo and before project report submission deadline (TBD).

Your report should include Title page with all team members Net Id, Name, Semester term, Project Title (e.g. Accident Analysis and Predictions ML models) and Table of Contents.

1. **Executive summary:** Project name, Brief summary, Objectives, and Technologies used.
2. **Code Execution Instructions:** Your report should detail how to run your code. Write a README about high level code logic. Please include the URL to the README section your report.
3. **Technological Challenges:** Document any technical issues you faced during the project, how you addressed them, and lessons learned.
4. **Changes in Technology:** If you used different technologies than those outlined in your original proposal, explain why these changes were made and how they impacted your project.
5. **Uncovered Aspects from Presentations:** Elaborate on any important points you couldn't cover during your presentation. Attach relevant screenshots or data from your experiments to support your explanations.
6. **Lessons Learned:** Reflect on what worked well, the challenges encountered, and how you overcame them. If this was not covered in your presentation, share your insights here.
7. **Future Improvements:** If you had more time, what additional features or improvements would you have included in your project?
8. **Data Sources, and Results:** Provide a link to your code repository and data sources. Include screenshots of your results with explanatory text to illustrate your work.

Feel free to include any other detail. Think of the Report as an additional resource that helps us gain a deeper understanding of your project and the process behind it.

Presentation Guidelines

- Each team will have only **15 minutes** to present. All team members need to be present at the assigned demo slot. NO show will result into zero grade towards final project.
- Practice your presentation to ensure you can effectively pitch your work within the time limit.

Good luck with your preparation. Reach out to us if you have any additional questions.
